

AUGUST 8, 2013

Highlights

The money market liquidity was relatively tight during the week ending August 7, 2013. The tightness is attributed to accumulation of deposits by Government at the Central Bank awaiting finalization of payment arrangements for the reconstituted Government Ministries. To alleviate the liquidity tightness the Central Bank injected Ksh 11.8 billion through net redemptions of repo securities.

The average interbank rate rose by 116.4 basis points to 9.71 percent during the week ending August 7, 2013 from 8.54 percent in the previous week.

It traded at an average of Ksh 87.39 against the US Dollar compared to Ksh 87.31 during the week ending August 1, 2013. The depreciation is attributed to increased dollar demand from exporters.

The usable official foreign exchange reserves held by Central Bank declined marginally to US Dollar 5,741 million as at August 8, 2013 from US Dollar 5,763 million as at August 1, 2013
