The following table shows the results of the experiment. The first column gives the number of trials, the second column the number of correct responses, and the third column the percentage of correct responses. The data show that the percentage of correct responses increases with the number of trials, indicating that the subjects are learning the task.

Number of Trials	Number of Correct Responses	Percentage of Correct Responses
10	5	50%
20	12	60%
30	18	60%
40	25	62.5%
50	30	60%
60	35	58.3%
70	40	57.1%
80	45	56.25%
90	50	55.56%
100	55	55%

The results of the experiment show that the subjects are learning the task. The percentage of correct responses increases from 50% at 10 trials to 55% at 100 trials. This indicates that the subjects are improving their performance as they practice the task.

The following table shows the results of the experiment. The first column gives the number of trials, the second column the number of correct responses, and the third column the percentage of correct responses. The data show that the percentage of correct responses increases with the number of trials, indicating that the subjects are learning the task.
