* This table has data from Central Bank and Commercial Banks only

Data has been re-classified to adopt a sectorisation that is aligned with global best practices, including Government Finance Statistics Manual (GFSM) 2014, Public Sector Debt Statistics 2014 Manual, System of National Accounts (SNA) 2008, and Monetary and Financial Statistics (MFS) 2016. The new classification leverages on Dhow Central Securities Depository (DhowCSD) system which has the capability to identify the ultimate holders of government securities. The new classification also captures information on any transfer of government securities that take place in the secondary market.

**Data coverage in this table has been expanded to include data from Central Bank, Commercial Banks, Microfinance Banks and SACCOs.

Data has been re-classified to adopt a sectorisation that is aligned with global best practices, including Government Finance Statistics Manual (GFSM) 2014, Public Sector Debt Statistics 2014 Manual, System of National Accounts (SNA) 2008, and Monetary and Financial Statistics (MFS) 2016. The new classification leverages on Dhow Central Securities Depository (DhowCSD) system which has the capability to identify the ultimate holders of government securities. The new classification also captures information on any transfer of government securities that take place in the secondary market.

* Provisional

Data has been re-classified to adopt a sectorisation that is aligned with global best practices, including Government Finance Statistics Manual (GFSM) 2014, Public Sector Debt Statistics 2014 Manual, System of National Accounts (SNA) 2008, and Monetary and Financial Statistics (MFS) 2016. The new classification leverages on Dhow Central Securities Depository (DhowCSD) system which has the capability to identify the ultimate holders of government securities. The new classification also captures information on any transfer of government securities that take place in the secondary market.
