NOTES

1. SUMMARISED ACCOUNTS OF THE BANKING SYSTEM

Previously, the banking system data included commercial banks and the Central Bank of Kenya (CBK) only. Starting with this publication for December 2022, the coverage has been expanded. The data includes the Central Bank of Kenya, 39 commercial banks, 1 mortgage finance company, 176 deposit taking saccos and 14 microfinance banks. Other financial institutions not yet captured in the data include pension funds, insurance companies, collective investment schemes and hire purchase companies. The data for the mortgage finance company is combined with that of commercial banks.

1.1 CENTRAL BANK OF KENYA

Table 1.1.1 and Table 1.1.2 contain monthly balance sheets of the CBK.

1.2 OTHER DEPOSITORY CORPORATIONS

Table 1.2.1 and Table 1.2.2 comprise aggregated monthly balance sheets of other depository corporations. The process of aggregation involves summing monthly balance sheet data of all commercial banks, microfinance banks and deposit taking sacco operating in Kenya.

1.3 DEPOSITORY CORPORATIONS SURVEY

1.3.1 Compilation of the Depository Corporations Survey (DCS)

Data for the DCS (Banking Survey), Table 1.3.1 and Table 1.3.2, are derived by consolidating data from both the Central Bank (Table 1.1.1 and Table 1.1.2), and the other depository corporations (Table 1.2.1 and Table 1.2.2). The consolidation also involves netting out intra system balances. For example, cash held by commercial banks in their tills are liabilities of the CBK and are netted out when compiling the DCS.

1.3.2 Definitions of Monetary Aggregates

Definitions of monetary aggregates were revised in 2006 to conform to the harmonised East African Community definitions. They are defined as follows:

Narrow Money

M0: Currency outside the banking system excluding commemorative coins.

M1: M0 + demand deposits of banks (or depository corporations) plus other deposits at CBK.

Broad Money

M2: M1 + quasi (long term) money deposits i.e. time and savings deposits of banks. This was previously M3.

The previous M2 was this aggregate less both quasi-money deposits in non-bank financial institutions and their holding of cash in till and any deposits they hold in other banks.

Extended Broad Money

M3 : M2 + resident foreign currency deposits.

2. DETAILED ACCOUNTS OF THE BANKING SYSTEM

These tables provide detailed information on the basis of which consolidated reports such as the DCS are derived, and also facilitate cross checks for the summary reports. Additional data include series on liquid assets (Table 2.2.2), commercial bank loans to the agricultural sector (Table 2.4.2 and Table 2.4.3) and interest rates (Table 2.6.1 and Table 2.6.2).

Liquid assets of commercial banks and microfinance banks are made up of their cash holdings, balances held at the CBK, investments in Treasury bills and bonds and balances held with banks abroad. The ratio of liquid assets to total deposits is the liquidity ratio and the statutory minimum ratio required currently stands at 20 percent. It is reported on a daily basis.

Commercial bank loans by type of enterprise for small scale enterprises, large scale enterprises, co-operative societies and agricultural boards are shown in Table 2.4.2. The same loans are structured according to maturities in Table 2.4.3.

Interest rates include commercial banks' weighted average lending and deposit rates. For example, the weighted average rate for various deposit accounts in a bank is computed as follows:

$$\sum \left(\frac{Q_i}{D} \right) \cdot r_i \text{ where:}$$

Σ is summation over all the deposit accounts in a bank

r_i is the rate of interest earned by the i^{th} deposit account

Q_i is the deposit amount for the i^{th} account.

D is total deposit amount for all the accounts, which is the sum of all Q_i . A representative rate for all the banks for a given type of deposit account is then obtained in a similar manner. In that case:

Σ is the summation over all the banks.

r_i is the average rate of interest offered by the i^{th} bank.

Q_i is the deposit amount for the i^{th} bank.

D is the total deposit for all the banks, which is the sum of all Q_i .

Weighted average lending rates are computed in a similar manner using the respective lending rates and loan amounts.

3. INTERNATIONAL TRADE AND FINANCE

3.1 MEAN AND END PERIOD EXCHANGE RATES

End period exchange rate refers to the closing mean exchange rate for the last trading day of each month. The mean exchange rate is computed as the simple average of the mean buying and selling exchange rates on any trading day. The mean buying and selling exchange rates are computed by calculating simple averages for the buying and selling exchange rates for major commercial banks in the foreign exchange market.

Uganda, Tanzania, Rwanda and Burundi currency units are quoted as currency units per Kenya shilling while all other currencies are quoted as Kenya shillings per currency unit. The Japanese yen is quoted as Kenya shillings per 100 Japanese yen.

3.2 BALANCE OF PAYMENTS

The balance of payments statement (Table 3.2.1) is obtained from the Economic Survey published by the Kenya National Bureau of Statistics (KNBS). No alterations are made to the figures but cross checks have been done. The statement conforms to the sixth edition of IMF's Balance of Payments Manual (BPM6). The reserve assets section reports changes that have taken place in reserve assets within the reference period.

3.3 FOREIGN TRADE SUMMARY

The foreign trade summary gives monthly total imports (cif), total exports (fob), re-exports (fob), and trade balance. Monthly totals may not add up to annual totals due to revisions made to monthly data in the course of the year. Therefore, annual totals reported by the CBK may differ slightly from annual totals reported by the KNBS in its annual publication.

4. GOVERNMENT FINANCE STATISTICS

4.1 CENTRAL GOVERNMENT FINANCE

4.1.1 Government Revenue and Grants

Government revenue is classified as tax or non-tax. Tax revenue comprises import duty, excise duty, income tax (including PAYE) and value added tax (VAT). Non-tax revenue comprises investment income, appropriations in aid (AIA) and other levies relating to traffic, land, airport, wildlife and tourism, licenses, fines and forfeitures. Grants are gift funds received by the Government from other governments or international organisations.

4.1.2 Government Expenditure and Net Lending (Commitment Basis)

Government expenditure is classified into two, namely, recurrent expenditure and development expenditure. Recurrent expenditure refers to expenditures incurred persistently (e.g. monthly). It consists of domestic interest and foreign payments, wages and salaries, pensions and payments for maintenance and operations. Development expenditure refers to the expenditures incurred on projects including relevant salaries and wages. Net lending is the difference between Central Government advances to parastatals and repayments by parastatals to the Central Government. It also includes Government guaranteed lending to public entities.

4.1.3 Budget Deficit and Surplus (Cash Basis)

A budget deficit results when expenditure exceeds revenue and grants. Conversely, when revenue exceeds expenditure, there is a surplus. The deficit on a commitment basis is the deficit derived using the expenditure the Government is under obligation (committed) to finance. The deficit on a cash basis is derived using the actual expenditure the Government has financed. It is the deficit on commitment basis adjusted for unsettled claims on the Government. The deficit on a cash basis takes into account stocks of funds paid in advance, expenditure arrears and cash in the main Government account, which is the Paymaster General (PMG).

4.1.4 Deficit Financing

The budget deficit is financed through external borrowing, domestic borrowing and sale of Government shares in parastatals (privatisation). External borrowing consists of credit from multilateral organisations including the World Bank, other countries (bilateral) and external commercial banks. Domestic borrowing is from the domestic money and capital markets through Treasury bills and bonds, and also loans and advances from banking institutions including any overdraft at CBK.

4.2 GOVERNMENT DEBT

Government debt comprises external and domestic debt. Domestic debt is reported on a gross basis and excludes Government deposits in commercial banks and CBK, also excluded are Treasury advances to parastatals. It consists of Government securities and government guaranteed loans and advances from commercial banks. External debt consists of public and publicly guaranteed debt from outside the country contracted in foreign currency.

In Table 4.2 the maturity of the security at the time of issue is shown, not the years to redemption of the various issues of the same tenor.

4.3 INTEREST RATES

4.3.1 Treasury Bill Interest Rate

Interest rates on Treasury bills are compiled from the weighted average weekly accepted tender rate for the 91-day, 182-day and 364-day Treasury bills. The average interest rate for the month is derived by computing a simple average of the weighted average weekly tender rates within the month. The Treasury bill rate does not include rates on the Repo Treasury bills which are issued for monetary policy purposes.

4.3.2 Treasury Bond Interest Rate

Treasury bonds are issued periodically and have maturities of between one and thirty years. The types of Treasury bonds which have been issued in Kenya are floating rate, special floating, fixed rate, discounted fixed rate, infrastructure and zero coupons. Interest rates paid on each bond tenor in a particular month is derived by computing the weighted average rate for bonds of the same tenor for which interest payments are due. But it should be noted that infrastructure bonds are tax free hence, their rates are not comparable with other bonds.

4.3.3 Interest on Government Overdraft at CBK

The Government is allowed to overdraw its accounts at the CBK up to a limit of 5 percent of the ordinary revenue in its latest audited accounts. Interest is charged on the overdraft amount at the Central Bank Rate (CBR).

5. NATIONAL ACCOUNTS

5.1 GROSS DOMESTIC PRODUCT (GDP) – CURRENT AND CONSTANT PRICES

National accounts data are compiled by the KNBS. Annual GDP data are extracted from the Economic Survey and Statistical Abstract published by KNBS annually. The Economic Survey is released in April or May each year. Quarterly real GDP figures are released with a lag of three months (One Quarter).

6. GENERAL ECONOMIC INDICATORS

6.1 CONSUMER PRICES

Data on consumer price indices (CPIs) are collected by the KNBS from 50 retail outlets in Kenya, 14 of which are in Nairobi and 36 in other areas, in the second and third week of every month. In accordance with the findings of the Kenya Integrated Household Budget Survey (KIHBS) conducted in 2015/16, the CPI basket was in February 2019 split into 13 categories of goods and services (previously 12) classified in conformity with the 2018 Classification of Individual Consumption According to Purpose (COICOP), and re-weighted to reflect the change in consumption patterns. The detailed methodology for computing CPI at the elementary and higher levels is contained in the KNBS Consumer Price Index Rebasing Report dated March 2020.

6.2 ECONOMIC INDICATORS

The series are derived from the annual Economic Survey and the monthly Leading Economic Indicators publications, both produced by the KNBS, and data from the Nairobi Securities Exchange.

6.3 REVISION POLICY

Provisional numbers are revised in subsequent editions of the Statistical bulletin.
