## **NOTES**

### **1: SUMMARISED ACCOUNTS OF THE BANKING SYSTEM**

The banking system, from which data in this publication is sourced, comprise of the Central Bank of Kenya, 43 commercial banks and 1 mortgage finance company. Other financial institutions not yet captured in the data include pension funds, insurance companies, hire purchase companies and micro-finance banks. The data for the mortgage finance company is combined with that of commercial banks

#### **1.1 CENTRAL BANK OF KENYA**

Table 1.1.1 and Table 1.1.2 contain monthly balance sheets of the Central Bank of Kenya (CBK). The official reserves in Table 1.2.1 include some components of Treasury accounts namely, the Reserve Position in the International Monetary Fund and other holdings of Government. Table 1.3.1 and Table 1.3.2 combine both the Treasury accounts and the CBK accounts to form the Monetary Authority's account.

#### **1.2 COMMERCIAL BANKS**

The series comprise of aggregated monthly balance sheets of commercial banks. The process of aggregation involves summing monthly balance sheet data of all commercial banks operating in Kenya.

#### **1.3. DEPOSITORY CORPORATION SURVEY**

##### **1.3.1 COMPILATION OF THE DEPOSITORY CORPORATION SURVEY (DCS)**

Data for the DCS (previously Banking Survey), Table 1.5.1 and Table 1.5.2, are derived by consolidating data from both the Monetary Authority Table 1.3.1 and Table 1.3.2, commercial banks Table 1.4.1 and Table 1.4.2. The consolidation also involves netting out intra system balances. For example, cash held by commercial banks in their tills are liabilities of the CBK and are netted out when compiling the Depository Corporation Survey.

##### **1.3.2 DEFINITIONS OF MONETARY AGGREGATES**

Definitions of monetary aggregates were revised in 2006 to conform to the harmonised East African Community definitions. They are defined as follows:

### Narrow Money

M0 : Currency outside the banking system excluding commemorative coins.

M1 : M0 + demand deposits of banks (or depository corporations) plus other deposits at CBK.

### Broad Money

M2 : M1 + quasi (long term) money deposits i.e. time and savings deposits of banks. This was previously M3.

The previous M2 was this aggregate less both quasi-money deposits in non-bank financial institutions and their holding of cash in till and any deposits they hold in other banks.

### Extended Broad Money

M3 : M2 + resident foreign currency deposits. This was previously M3X.

### Overall Liquidity

L : M3 + non-bank holdings of Government Paper. This, however, is not a monetary aggregate.

## 2: DETAILED ACCOUNTS OF THE BANKING SYSTEM

These tables provide detailed information on the basis of which consolidated reports such as the Depository Corporation Survey are derived, and also facilitate cross checks for the summary reports. Additional data include series on liquid assets (Table 2.2.2), commercial bank loans to the agricultural sector (Table 2.2.5 and Table 2.2.6) and interest rates (Table 2.4.1 and Table 2.4.2).

Liquid assets of commercial banks are made up of their cash holdings, balances held at the CBK, investments in Government Treasury bills and bonds and balances held with banks abroad. The ratio of liquid assets to total deposits is the liquidity ratio and the statutory minimum ratio required currently stands at 20 percent. It is reported on a daily basis.

Commercial bank loans by type of enterprise for small scale enterprises, large scale enterprises, co-operative societies and agricultural boards are shown in Table 2.2.5. The same loans are structured according to maturities in Table 2.2.6.

Interest rates include commercial banks' weighted average lending and deposit rates. For example, the weighted average rate for various deposit accounts in a bank is computed as follows:

$$\sum \left( \frac{Q_i}{D} \right) \cdot r_i \quad \text{where:}$$

$\sum$  is summation over all the deposit accounts in a bank

$r_i$  is the rate of interest earned by the  $i^{\text{th}}$  deposit account

$Q_i$  is the deposit amounts for the  $i^{\text{th}}$  account.

$D$  is total deposit amount for all the accounts, which is the sum of all  $Q_i$ .

A representative rate for all the banks for a given type of deposit account is then obtained in a similar manner. In that case:

$\Sigma$  is the summation over all the banks.

$r_i$  is the average rate of interest offered by the  $i^{\text{th}}$  bank.

$Q_i$  is the deposit amount for the  $i^{\text{th}}$  bank.

$D$  is the total deposit for all the banks, which is the sum of all  $Q_i$ .

Weighted average lending rates are computed in a similar manner using the respective lending rates and loan amounts.

### **3: INTERNATIONAL TRADE AND FINANCE**

#### **3.1. MEAN AND END PERIOD EXCHANGE RATES**

End period exchange rate refers to the closing mean exchange rate for the last trading day of each month. The mean exchange rate is computed as the simple average of the mean buying and selling exchange rates on any trading day. The mean buying and selling exchange rates are computed by calculating simple averages for the buying and selling exchange rates for major commercial bank players in the foreign exchange market.

Uganda, Tanzania, Rwanda and Burundi currency units are quoted as currency units per Kenya shilling while all other currencies are quoted as Kenya shillings per currency unit. The Japanese yen is quoted as Kenya shillings per 100 Japanese yen.

#### **3.2 BALANCE OF PAYMENTS**

The balance of payments statements (Table 3.2.1 ) is obtained from the Economic Survey published by the Kenya National Bureau of Statistics (KNBS). No alterations are made to the figures but cross checks have been done. The statements conforms to the six edition of IMF's Balance of Payments Manual (BPM6). The reserve assets section reports changes that have taken place in reserve assets within the reference period.

#### **3.3 FOREIGN TRADE SUMMARY**

The foreign trade summary gives monthly total imports (cif), total exports (fob), re-exports (fob), and trade balance. Monthly totals may not add up to annual totals due to revisions made to monthly data in the course of the year. Therefore, annual totals reported by the CBK may differ slightly from annual totals reported by the KNBS in its annual publication.

## **4: GOVERNMENT FINANCE STATISTICS**

### **4.1 CENTRAL GOVERNMENT FINANCE**

#### **4.1.1 Government Revenue and Grants**

Government revenue is classified as tax or non-tax. Tax revenue comprises import duty, excise duty, income tax (including PAYE) and value added tax (VAT). Non-tax revenue comprises investment income, appropriations in aid (AIA) and other levies relating to traffic, land, airport, wildlife and tourism, licenses, fines and forfeitures. Grants are gift funds received by the Government from other governments or international organisations.

#### **4.1.2 Government Expenditure and Net Lending (Commitment Basis)**

Government expenditure is classified into two, namely, recurrent expenditure and development expenditure. Recurrent expenditure refers to expenditures incurred persistently (e.g. monthly). It consists of domestic interest and foreign payments, wages and salaries, pensions and payments for maintenance and operations. Development expenditure refers to the expenditures incurred on projects including relevant salaries and wages. Net lending is the difference between Central Government advances to parastatals and repayments by parastatals to the Central Government. It also includes Government guaranteed lending to public entities.

#### **4.1.3 Budget Deficit and Surplus (Cash Basis)**

A budget deficit results when expenditure exceeds revenue and grants. Conversely, when revenue exceeds expenditure, there is a surplus. The deficit on a commitment basis is the deficit derived using the expenditure the Government is under obligation (committed) to finance. The deficit on a cash basis is derived using the actual expenditure the Government has financed. It is the deficit on commitment basis adjusted for unsettled claims on the Government. The deficit on a cash basis takes into account stocks of funds paid in advance, expenditure arrears and cash in the main Government account, which is the Paymaster General (PMG).

#### **4.1.4 Deficit Financing**

The budget deficit is financed through external borrowing, domestic borrowing and sale of Government shares in parastatals (privatisation). External borrowing consists of credit from multilateral organisations including the World Bank, other countries (bilateral) and external commercial banks. Domestic borrowing is from the domestic money and capital markets through Treasury bills and bonds, and also loans and advances from banking institutions including any overdraft at CBK.

## **4.2 GOVERNMENT DEBT**

Government debt comprises external and domestic debt. Domestic debt is reported on a gross basis and excludes Government deposits in commercial banks and CBK , also excluded are Treasury advances to parastatals. It consists of Government securities and government guaranteed loans and advances from commercial banks. External debt consists of public and publicly guaranteed debt from outside the country contracted in foreign currency.

In Table 4.2 the maturity of the security at the time of issue is shown, not the years to redemption of the various issues of the same tenor.

## **4.3 INTEREST RATES**

### **4.3.1 Treasury Bill Interest Rate**

Interest rates on Treasury bills are compiled from the weighted average weekly accepted tender rate for the 91-day, 182-day and 364-day Treasury bills. The average interest rate for the month is derived by computing a simple average of the weighted average weekly tender rates within the month. The Treasury bill rate does not include rates on the Repo Treasury bills which are issued for monetary policy purposes.

### **4.3.2 Treasury Bond Interest Rate**

Treasury bonds are issued periodically and have maturities of between one and thirty years. The types of Treasury bonds which have been issued in Kenya are floating rate, special floating, fixed rate, discounted fixed rate, infrastructure and zero coupons. Interest rates paid on each bond tenor in a particular month is derived by computing the weighted average rate for bonds of the same tenor for which interest payments are due. But it should be noted that infrastructure bonds are tax free hence, their rates are not comparable with other bonds.

### **4.3.3 Interest on Government Overdraft at CBK**

The Government is allowed to overdraw its accounts at the CBK up to a limit of 5 percent of the ordinary revenue in its latest audited accounts. Interest is charged on the overdraft amount at the Central Bank Rate (CBR) .

## **5: NATIONAL ACCOUNTS**

### **5.1. GROSS DOMESTIC PRODUCT (GDP) – CURRENT AND CONSTANT (2009) PRICES**

National accounts data are compiled by the KNBS. Annual GDP data are extracted from the Economic Survey and Statistical Abstract published by KNBS annually. The Economic Survey is released in April or May each year. Quarterly real GDP figures are released with a lag of three months.

## **6: GENERAL ECONOMIC INDICATORS**

### **6.1 CONSUMER PRICES**

Data on consumer price indices (CPIs) are collected by the KNBS from retail outlets in 25 urban centers in Kenya in the second and third week of every month. In accordance with the findings of the Kenya Integrated Household Budget Survey (KIHBS) conducted in 2005/06, the CPI basket was, in February 2009, split into 12 categories of goods and services (previously 10) classified in conformity with the Classification of Individual Consumption According to Purpose (COICOP), and re-weighted to reflect the change in consumption patterns. This CPI reflects the classification and weights.

The Geometric Mean computation method was adopted beginning October 2009, replacing the Arithmetic Mean method which had hitherto been applied. Under the new method, the CPI is computed using the standard Laspeyres Index together with geometric averaging at the elementary level and arithmetic averaging at the higher level. The series dating back to October 2005 was recomputed using the new method but applying the old weights (not presented in the current issue).

The detailed methodology for computing CPI at the elementary and higher levels is contained in the KNBS - The 2008 Consumer Price Index (CPI) – publication.

### **6.2 ECONOMIC INDICATORS**

The series are derived from the annual Economic Survey and the monthly Leading Economic Indicators publications, both produced by the KNBS, and data from the Nairobi Securities Exchange.

<sup>1</sup> Commercial Banks lending rates are weighted averages.

<sup>2</sup> Weighted average interest rates at which commercial banks borrow from the CBK. Effective June 2006, the Central Bank Rate (CBR) was introduced in place of the re-discount rate. Beginning October 2011, effective rates is CBR plus penalty

<sup>3</sup> Interest rate at which CBK lends liquidity to commercial banks through repurchase agreement securities

<sup>4</sup> Monthly average interest rate at which CBK mops excess liquidity from commercial banks through repurchase agreement securities and term auction deposits (TAD).

<sup>5</sup> Volume weighted interest rate at which commercial banks borrow from each other.

\* Figures are cumulative from the beginning of the fiscal year in July.

\*\* Adjustment to cash includes foreign interest due but not paid, foreign interest arrears paid, change in pending bills and previous years expenditure financed in the current fiscal year. A negative sign means payments were made on commitments incurred in earlier financial years.

<sup>1</sup>Treasury bill rates exclude Central Bank of Kenya Repo Treasury bills

**Note:**

1. For any month, a weighted average rate is computed for floating rate, fixed rate, discounted fixed rate, zero coupon and special bonds .

2. Blanks indicates no interest was due in the particular month.

3. Interest rate charged on Government Overdraft at CBK is the same as the Central Bank Rate

4 Reopened bonds are recorded as at initial maturity and not as at period to maturity hence reopen, bond rates are usually lower than primary market.

<sup>\text{1}</sup> CPI for urban households in Kenya.

<sup>\text{2}</sup> The method of compilation of CPI was revised in October 2009 from Arithmetic mean to Geometric Mean. The basket and the weights were revised based on the Kenya Integrated Household Budget Survey in 2005/06.

<sup>\text{3}</sup> Nairobi has a weight of 0.412 and Other Urban Centers 0.588 in the calculation of the weights for the overall CPI index.
